

WiperFill™

Recycle the Rain™ 

COMMERCIAL BENEFITS

1. Eliminates the need for filtered water used in the bottling & reservoir filling process
2. Reduces logistics costs & weight by placing up to 35 times more product on a single pallet when compared to traditional wiper fluid products
3. Low liability product
4. Reduces shelf space and inventory footprint by 60-70% when compared to traditional wiper fluid products
5. Utilizes existing soap concentrates - no need for premixing bottles
6. Large market potential (Aftermarket & OEM)
7. Primary and reoccurring sales
8. DIY or service installation
9. Cartridges are recyclable
10. Utilizes existing materials and methods in the manufacturing process
 - a. Bug and cleaning fluid for warm weather
 - b. Antifreeze and deicing fluid for colder climates
11. Internet and mail order opportunities for complete systems and replacement cells
12. Allows OEMs the ability to reduce the wiper fluid reservoir size and weight of a vehicle

CONSUMER BENEFITS

1. Automatically maintains wiper fluid in your reservoir by recycling rain and other fluids that come into contact with your windshield
2. Cartridges are available for use in all climates
 - a. Bug and cleaning fluid for warm weather
 - b. Antifreeze and deicing fluid for colder climates
3. No heavy fluid containers to pour and spill
4. Go Green!
 - a. Eliminates the need for single use plastic containers
 - b. Eliminates the need for hundreds of millions of gallons of water used in the bottling & OEM reservoir filling process annually. Recycle the Rain™

GO GREEN!

1. WiperFill eliminates the need for hundreds of millions of gallons of filtered water used in the bottling & OEM reservoir filling process annually
2. Eliminates the need for single use plastic bottles that may be disposed of into landfills
3. WiperFill cartridges are recyclable & reusable
4. Dramatically reduces carbon emissions by making shipments up to 35 times more efficient per load when compared to traditional wiper fluid products

WiperFill is a patented (Utility) product that maintains a high windshield wiper fluid level.

Fluids (from rain, melting ice, car wash or any other source) is captured, filtered and mixed with liquid concentrates to fill your reservoir with either cleaner or antifreeze!

Licensing & purchase opportunities are now available!
